Education

Wuhan University, School of Mathematics and Statistics

Bachelor of Science

Major: Data Science and Big Data Technology

Major GPA: 93.4/100 (GPA: 3.88/4)

Major Rank: 1/63

Selected Coursework: Mathematical Analysis, Advanced Algebra, Probability, Statistics, Real Analysis, Optimization, Numerical Analysis, Machine Learning, Deep Learning.

Research Experience

Study on Spatial Multi-omics and Neural Networks | 2025.10-2026.01

- Learnt core deep learning architectures (ResNet, GNN, VAE, GAN).
- Reviewed methods including self-supervised learning, contrastive learning, and distillation for spatial multi-omics tasks.
- Reproduced selected papers: preprocessing, implementation, and result comparison.

Neural Network-driven NLP Research | 2026.02-2026.03

- Completed intensive NLP research training (Encoder-Decoder, Transformer, BERT/GPT).
- Built and evaluated end-to-end sentiment analysis pipelines on social media text, using N-gram baselines and recurrent models (RNN/LSTM).
- Delivered a structured final report with method comparison and practical findings for real-world text analysis.

Project Experience

Bomb Cat, Game Development Project | 2025.05-2025.06

- Led architecture and implemented core Python/Pygame modules: battle logic, card draw, and encyclopedia interactions.
- Refactored code into modular components, improving maintainability and team efficiency.
- Designed and polished encyclopedia UI behaviors, including scrolling and hover interactions.
- Built key UI interactions (scroll and hover); coordinated testing in a 5-member team with over 30% personal code contribution.

Awards and Competitions

- National Scholarship** (National level, 2025)
- First-Class University Scholarship** (University level, 2025)
- Merit Student and Outstanding Dormitory Leader** (University level, 2025)
- Lanqiao Cup Provincial Competition** (Software and Information Technology): First Prize, 2025
- Lanqiao Cup National Finals** (Software and Information Technology): Third Prize, 2025

Technical Skills

- Programming:** Python (proficient), C/C++ (familiar).
- Research & Writing:** Markdown, LaTeX.
- Algorithms:** Maintains personal repository BasicAlgorithms summarizing implementations of common algorithms.
- English:** CET-4, CET-6.
